

***PhotoFast* CR-5400**

Dual Slot microSD(HC) to MS Pro Duo Adapter

Specifications:

- ◆ Supported microSD: 256MB - 2GB
- ◆ Supported microSDHC: 4GB - 32GB
- ◆ Maximum capacity: 64GB
- ◆ Operation Temperature: 0C to +70C
- ◆ Storage Temperature: -25C to +85C
- ◆ Dimensions: 31.1mm x 20mm x 1.6mm
- ◆ Weight: 2g

Features:

- ◆ **Holds 2 cards for super large capacity**
CR-5400 converts 2 microSD(HC) into one MS Pro Duo stick.
- ◆ **Card types can be mixed**
Cards of different capacity and different type can be used concurrently (i.e. microSD + microSDHC).
- ◆ **Freedom of expansion and upgrade**
CR-5400 works with only 1 microSD(HC) card as well. The second slot can be equipped anytime later.
- ◆ **Super high read/write speeds of 10MB/s up**
CR-5400 is made of high quality components and preserves the original speed of the inserted microSD(HC) cards. When two different types of microSD(HC) cards are used, the slower card sets the speed rate.
- ◆ CE, FCC certified
- ◆ RoHS compliant
- ◆ Designed in Japan
- ◆ Assembled in Taiwan
- ◆ 2 Years Warranty

How to use:

◆ Get started

Before using CR-5400 the first time, microSD(HC) card(s) needs to be inserted into the Adapter and formatted in any Sony device.

◆ Using only 1 microSD(HC) card

If only 1 microSD(HC) card is used, it needs to be inserted into slot#1.

◆ Data transfer

Data transfer can only be done with microSD(HC) card(s) inserted in CR-5400. Direct PC-to-microSD(HC) card transfer and then inserting into CR-5400 won't work.

◆ Re-using microSD(HC) card(s)

If the inserted and formatted microSD(HC) card(s) should be re-used in any other device (such as a mobile phone), the specific microSD(HC) card needs to be formatted in slot#1 while slot#2 must be empty.

◆ Compatibility

CR-5400 is 100% compatible to Sony PSP/PS3 and Digital Cameras, however, European Camcorders may output an error message, but recording and playback is still possible.

◆ Handling CR-5400

Always hold the edge of CR-5400 while inserting microSD(HC) card(s).
