[Image for G-Monster V4S SLC](http://www.photofast.tw/forum/download/driver/firmware_v1571_G-Monster-V4S_SLC.rar)

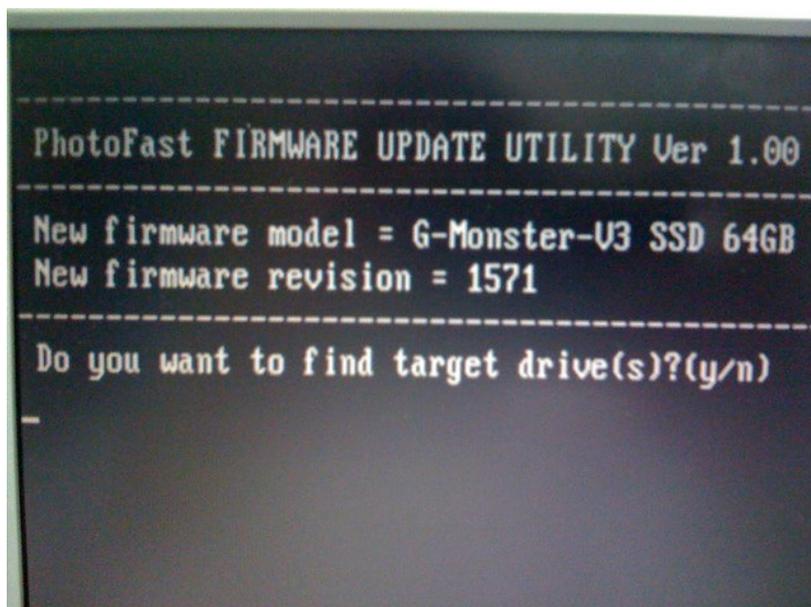

http://www.photofast.tw/forum/download/driver/firmware_v1571_G-Monster-V4S_SLC.rar

Getting started:

1. Use burning software to burn DOS bootable CD from image file.
2. Turn off the PC
3. Connect the SSD to a spare SATA port (jumper are unnecessary)
4. Boot your PC and enter the BIOS Setup utility by pressing Del.
5. Change the SATA mode to IDE.
6. Change the Boot Device Order to CDROM as first Boot Device
7. Save and Exit BIOS setup.

Firmware Upgrade Process:

1. Turn on the PC and boot from CD.
2. Type "fwupdate.exe" and execute
3. The utility will respond you: "Do you want to find Target Drives?"

4. Press "Y" to get a listing of all SSDs attached to the system, than enter the drive number to update the F/W.

All data would be erased, please double check before start.

```
PhotoFast FIRMWARE UPDATE UTILITY Ver 1.00
-----
New firmware model = G-Monster-U3 SSD 64GB
New firmware revision = 1571
-----
Num      Revision      Capacity      Model
